

MINADI MALLIKARACHCHI

Information Technology Undergraduate

074- 3207581 |minadi4124@gmail.com| No.320/2,Sama Mawatha, Biyagama

PROFILE

Enthusiastic Third-year undergraduate student specializing in Information Technology with a strong foundation in software development and systems administration. Focused on leveraging technical skills in Java, Python, and web technologies to solve complex problems while actively seeking opportunities to contribute to innovative projects. A dedicated team player with a proven track record of leadership in extracurricular activities, committed to continuous learning and professional growth within the IT industry.

EDUCATION

2024 – 2028: Undergraduate BSc (Hons) in Information Technology

- Specialized in Information Technology
- Sri Lanka Institute of Information Technology (SLIIT)

2023: G.C.E. Advanced Level

- Musaeus College, Colombo 07
- Results: Communication and Media Studies (A), Logic and Scientific Method (B), Economics (B)
- Selected for Management Studies at Eastern University of Sri Lanka.

2020: G.C.E. Ordinary Level

- Musaeus College, Colombo 07

PROJECTS

RideLink - Ride-Sharing Microservices Platform

- Technologies and Tools: Microservices, Node.js, REST APIs, CI/CD, Postman, Git
- Architected and implemented a robust backend microservices solution structured around four core services (Account, Driver & Vehicle, Ride Management, and Fare & Payment) using Node.js and RESTful JSON APIs.
- Established independent persistence boundaries, interservice communication methods, and role-based security mechanisms.
- Configured an automated CI/CD pipeline using Git, and documented APIs thoroughly via Swagger/OpenAPI and Postman.

Hotel Management System

- Technologies and Tools: Java, MySQL, IntelliJ, System Administration principles.
- Developed a comprehensive system to manage room bookings and staff records as part of the Operating System and System Administration module.
- Focused on backend data persistence and administrative workflows for efficient hospitality management

Mobile App for Hotel Management

- Technologies and Tools: React Native/Flutter, Firebase, REST APIs, JavaScript.
- Designed and developed a mobile application for real-time hotel service tracking and user bookings.
- Implemented a responsive UI/UX to ensure seamless navigation for mobile users.

IPL Match Winner Predictor System

- Technologies and Tools: Python, Scikit-learn, Pandas, Jupyter Notebook.
- Built a predictive model using historical IPL data to forecast match outcomes.
- Applied data preprocessing, feature engineering, and classification algorithms to enhance prediction accuracy.

Web-Based Video Browsing System

- Technologies and Tools: HTML, CSS, JavaScript, PHP, MySQL, UML Modeling.
- Developed a platform for browsing and managing video content, focusing on the software engineering lifecycle.
- Created detailed sequence diagrams and EER-to-relational schema mappings to guide the development process.

Home Tutor Search and Booking System

- Technologies and Tools: Java, JavaFX, OOP Principles, MySQL.
- Implemented a desktop application that allows users to search for and book tutors based on specific criteria.
- Utilized advanced Object-Oriented Programming constructs and GUI design to provide a user-friendly interface.

Green House Automated System

- Technologies and Tools: C/C++, Arduino/Raspberry Pi, Sensors (DHT11, LDR), Fundamental Computing Logic.
- Designed an automated system to monitor and control greenhouse environmental factors like temperature and light.
- Focused on the integration of hardware and software for real-time environmental monitoring.

SKILLS

Technical Skills

- Java | Python | JavaFX | HTML | CSS | JavaScript | XML | MySQL | SQL | R | Pandas | Machine Learning | AI | OOP | MongoDB

Soft Skills

- Leadership | Problem Solving | Team Work | Verbal & Written Communication | Analytical Skills | Time Management | Adaptability
